

Ladies and Gentlemen, I own a small trucking company that travels all 48 states and I must say that the best piece of broadcasting to enter the arena since the introduction of FM has been XM radio. I have it installed in my trucks for the convenience of my drivers as well as myself. There is a format for all tastes and walks of life. More important is the travel adviseries in major metropolitan areas. This allows my drivers to alter their route to avoid major traffic tie ups. It allows delivery of our freight on time. The weather is also very important to us and without the weather channel we would be flying blind. I have been in the trucking industry for 34 years and if XM radio is scaled back because of a bunch of greedy businesses I will not go back to fm radio. Let the free enterprise system work the way it was meant to. If you have a product that will sell let it sell itself or get the hell out of the game.

Sincerely

Stacy C. Leavitt, Sr.
